Bitmain Cayman (hereinafter referred to as 'Bitmain') reserves the right to make corrections, modifications,

enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice.

Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to Bitmain's terms and conditions of sale supplied at the time of order acknowledgment.

Bitmain warrants performance of its products to the specifications applicable at the time of sale in accordance with Bitmain's standard warranty. Testing and other quality control techniques are used to the extent Bitmain deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

Bitmain assumes no liability for third-party applications assistance. Customers are responsible for their products and applications using Bitmain components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

Bitmain does not warrant or represent that any license, either express or implied, is granted under any Bitmain patent right, copyright or other Bitmain intellectual property right relating to any combination, machine, or process in which Bitmain products or services are used. Information published by Bitmain regarding third-party products or services does not constitute a license from Bitmain to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from Bitmain under the patents or other intellectual property of Bitmain.

Resale of Bitmain products or services with statements different from or beyond the parameters stated by Bitmain for that product or service voids all express and any implied warranties for the associated Bitmain product or service and is an unfair and deceptive business practice. Bitmain is not responsible or liable for any such statements.

1. Overview

The S19 server is Bitmain's newest version in the 19 server series. Power supply APW12 is part of S19 server. All S19 servers are tested and configured prior to shipping to ensure easy set up.

Front View

Caution:

1. Please refer to the layout above to place your goods in usage in case of any damage.

2. The equipment must be connected to an earthed mains socket-outlet. The socket-outlet shall be installed near the equipment and shall be easily accessible.

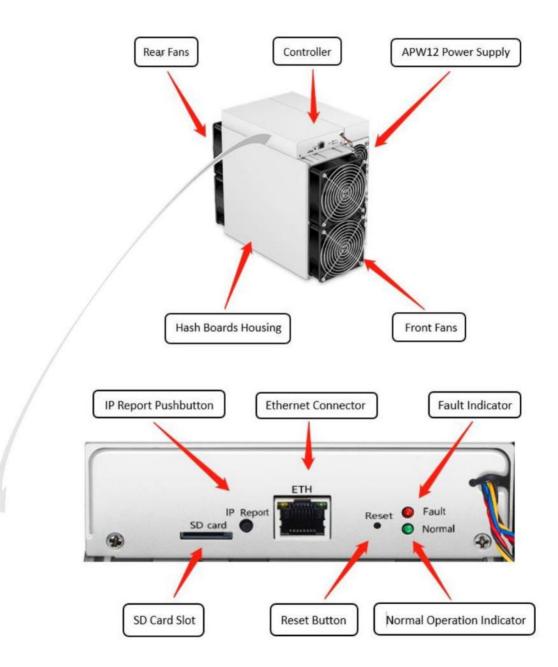

3. The equipment has two power inputs, only by connecting those two power supply sockets simultaneously can the equipment run. When the equipment is powered off, be sure to power off all power inputs.

4. DO NOT remove any screws and cables tied on the product.

5. DO NOT PRESS the metal button on the cover.

1.1 S19 Server Components

The main components and controller front panel of S19 servers are shown in the following figure:

APW12 Power Supply:

Note:

O

1. Power supply APW12 is part of S19 server. For detailed parameters, please refer to the specifications below.

2.Additional two power cords are needed.

1.2 Specifications

Product Glance	Value
Version Model No. Crypto Algorithm	S19 240-Ca SHA256
Hashrate, TH/s	95 ± 3%
Power on wall @25°C, Watt	3250 ± 5%
Power efficiency on wall @25°C, J/TH	34.5 ± 5%

Detailed Characteristics	Value							
Power Supply								
Power supply AC Input voltage, Volt (1-1)	200~240							
Power supply AC Input Frequency Range, Hz	47~63							
Power supply AC Input current, Amp ₍₁₋₂₎	20(1-3)							
Hardware Configuration								
Networking connection mode	RJ45 Ethernet 10/100M							
Server Size (Length*Width*Height, w/o_package), mm ₍₂₋₁₎	400*195.5*290							
Server Size (Length*Width*Height, with package), mm	570*316*430							
Net weight, kg ⁽²⁻²⁾	14.2							
Gross weight, kg	16.0							

Environment Requirements						
Operation temperature,°C	0~40					
Storage temperature,° C	-20~70					
Operation humidity(non-condensing) , RH	10~90%					
Operation altitude, m ₍₃₋₁₎	≤2000					

NOTE:

- 1. To prevent the spread of virus in the firmware, which can cause damage to the Antminer S19 series, the setting function of "Secure Boot" has been switched on and the "Root Authority" function has been disabled.
- 2. If the user fails to use the product in accordance with the given instructions, specifications, and conditions provided, or change the function setting without Bitmain's prior consent, Bitmain will not be liable for any damage arising therefrom.
- (1-1) Caution: Wrong input voltage may probably cause server damaged
- (1-2) Max condition: temperature 40°C, altitude 0m
- (1-3) Two AC input wires, 10A per wire
- (2-1) Including PSU size
- (2-2) Including PSU weight
- (3-1) When the server is used at an altitude from 900m to 2000m, the highest operating temperature decreases by 1° C for every increase of 300m

2. Setting Up the Server

To set up the server:

The file IPReporter.zip is supported by Microsoft Windows only.

1. Go to the following site:

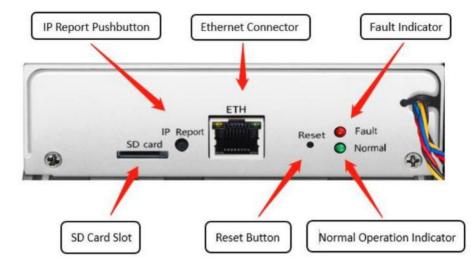

https://shop.bitmain.com/support.htm?pid=00720160906053730999PVD2K0vz0693

- 2. Download the following file: IPReporter.zip.
- 3. Extract the file.

The default DHCP network protocol distributes IP addresses automatically.

- 4. Right-click IPReporter.exe and run it as Administrator.
- 5. Select one of the following options:
 - Shelf, Step, Position suitable for farm servers to mark the location of the servers.
 - Default suitable for home servers.
- 6. Click Start.

			lp	Reporte	r		÷.	=
Shelf	1	Step	1	Pos	ition 1		Star	t)
Inform	nation	-	1					-
NO.	IP				MAC			
this is	suitable for	farm mi	ners to ma	ark location	n of miner	5.		
IF YOU	l're home mi	ner, you	may leave	e it as det	ault direct	Ŋ.		
<								>
				_				
	Skip		Stop		Export		Quit	

7. On the controller board, click the IP Report button. Hold it down until it beeps (about 5 seconds).

The IP address will be displayed in a window on your computer screen.

helf 1	Step 1	Position	1 1	Start	
	C	onfirmation		×	
	100000		_		
	IP 1010.70.12	23			
	MAC 6C:EC:EB:62:39:F2				
PC	DSITION 1-1				
	OK	Skip	Stop		
	_	_	-		
Skip	Stop	E	xport	Quit	

- 7. In your web browser, enter the IP address provided.
- 8. Proceed to login using root for both the username and password.
- 9. In the Protocol section, you can assign a Static IP address (optional).
- 10. Enter the IP address, Subnet mask, gateway and DNS Server.
- 11. Click "Save".
- 12. Click <u>https://support.bitmain.com/hc/en-us/articles/360018950053</u> to learn more about gateway and DNS Server.

3. Configuring the Server

Setting up the Pool

To configure the server:

1. Click Setting marked below.

		Mining address	Miner name	Password (optional)
	Pool1		1007	all.
	Pool2	1.001	- Second Se	4000
	Pool3	101	100	
100	peed percentage	100		
	Mode	Normal •		
		Sleep		
			Save	

Note:

1. Fan speed percentage can be adjusted, but we recommend to keep the default setting. The server will adjust the fan speed automatically if the fan speed percentage has yet been selected.

2. There are two working modes of S19 server: Normal mode and Sleep mode. The server enters the sleep

mode under the condition that the control board is powered while hashboards are not powered.

2. Set the options according to the following table:

Option	Description
Mining address	Enter the address of your desired pool. The S19 servers can be set up with three mining pools, with decreasing priority from the first pool (pool 1) to the third pool (pool 3). The pools with low priority will only be used if all higher priority pools are offline.
Name	Your worker ID on the selected pool.
Password (optional)	The password for your selected worker.

3. Click Save after the configuration.

4. Monitoring Your server

To check the operating status of your server:

1. Click dashboard marked below to check the server status.

ANTMINER	= Antm	iner S19a Pro (Algo	rithm SHA266d	e Ontre				Locate M	liner 🕕	() Ref	resh Timer 2	021-05-	28 09:16:1	t 🖶 English 🗸

Note: The S19 server is with fixed frequency 675 MHz. Firmware will stop running when the Temp (Outlet) reaches to 95° , there will be an error message "over max temp, pcb temp (real-time temp)" shown on the bottom of kernel log page. Meanwhile, the server temperature on the dashboard interface turns to abnormal and shows "Temp is too high".

2. Monitor your server according to the descriptions in the following table:

Option	Description			
Number of chips	Number of chips detected in the chain.			
Frequency	SIC frequency setting.			
Real Hashrate	teal-time Hashrate of each hash board (GH/s).			
Inlet Temp	Temperature of the inlet (°C).			
Outlet Temp	Temperature of the outlet (°C).			
Chip state	One of the following statuses will appear:			
	The Green Icon - indicates normal			
	The Red Icon- indicates abnormal			

5. Administering Your Server

5.1 Checking Your Firmware Version

To check your firmware version:

- 1. Enter the backstage of your server, find the firmware version on the bottom.
- 2. **Firmware Version** displays the date of the firmware your server uses. In the examples below, the server is using firmware version 20200405.

	Antrainer S10 (Algorithm 8H4236d)		🕑 Retriesh Timer 2020-04-21 18 06 28 🖨 English ~

5.2 Upgrading Your System

Make sure that the S19 server remains powered during the upgrade process. If power fails before the upgrade is completed, you will need to return it to Bitmain for repair.

To upgrade the server's firmware:

1. In System, click Firmware Upgrade.

ANTMINER B: Dashboard C: Miner Setting	Firmware upgrade			
않 IP Setting 당 System 스 순 Password	Firmware File	Keep settings		
Firmwate upgrade		Update		

2. For Keep Settings:

3. Click the

- Select "keep settings" to keep your current settings (default).
- Unselect "keep settings" to reset the server to default settings.
 - button and navigate to the upgrade file. Select the upgrade file, then click **Update**.
- 4. When the upgrade is completed, restart the server and it will turn to the setting page.

	Mining address	Miner name	Password (optional)
Pool1			
Pro12		- 1000	
Poot3	181		1000
Mode	- Normal		
	Normal Steep		
		Save	

5.3 Modifying Your Password

To change your login password:

- 1. In System, click the Password tab.
- 2. Set your new password, then click **Save**.

B Dashboard			
E Miner Setting	Reset password		
¢å∮ IP Setting			
남유 System ~	Current password		
BI STATISTICS	New password	- 53	
Password	Confirm password	23	
C) Firmware upgrade		Save	

5.4 Restoring Initial Settings

To restore your initial settings

- 1. Turn on the server and let it run for 5 minutes.
- 2. On the controller front panel, press and hold the **Reset** button for 10 seconds.

Environmental Requirements

Please run your server in accordance with the following requirements

1. Basic Environmental Requirements:

1.1. Climatic Conditions:

Description	Requirement
Operating Temperature	0-40°C
Operating Humidity	10-90%RH (non-condensing)
Storage Temperature	-20-70℃
Storage Humidity	() 5-95%RH non-condensing
Altitude	<2000m

1.2. Site Requirements of the Server Running Room:

Please keep the server running room away from industrial pollution sources:

For heavy pollution sources such as smelters and coal mines, the distance should be more than 5km.

For moderate pollution sources such as chemical industries, rubber and electroplating industries, the distance should be more than 3.7km.

For light pollution sources such as food factories and leather processing factories, the distance should be more than 2km.

If unavoidable, the site should be chosen in the perennial upwind direction of the pollution source.

Please do not set your location within 3.7km from the seaside or the salt lake. If unavoidable, it should be built as airtight as possible, equipped with air conditioning for cooling.

1.3. Electromagnetic Environmental Conditions:

Please keep your site away from transformers, high-voltage cables, transmission lines and high-current equipment, for example, there should be no high-power AC transformers (>10KA) within 20 meters, and no high-voltage power lines within 50 meters. Please keep your site away from high-power radio transmitters, for example, there should be no high-power radio transmitters (>1500W) within 100 meters.

2. Other Environmental Requirements:

The server running room shall be free of explosive, conductive, magnetically conductive and corrosive dust. The requirements of mechanical active substances are shown below:

2.1 Requirements of Mechanical Active Substances

Mechanical Active Substance	Requirement
Sand	<= 30mg/m ³
Dust (suspended)	<= 0.2mg/m ³
Dust (deposited)	<=1.5mg/m ² h

2.2 Requirements of Corrosive Gas

Corrosive Gas	Unit	Concentration	
H ₂ S	ppb	< 3	
SO ₂	ppb	< 10	
Cl ₂	ppb	< 1	
NO ₂	ppb	< 50	
HF	ppb	< 1	
NH ₃	ppb	< 500	
O ₃	ppb	< 2	
Note: ppb (part per billion) refers to the unit of concentration, 1ppb stands for the volume ratio of			
part per billion.			

Regulations:

FCC Notice (FOR FCC CERTIFIED MODELS):

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note:

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

EU WEEE: Disposal of Waste Equipment by Users in Private Household in the European Union

This symbol on the product or on its packaging indicates that this product must not be disposed of with your other household waste. Instead, it is your responsibility to dispose of your waste equipment by handling it over to a designated collection point for the recycling of waste electrical and electronic equipment. The separate collection and recycling of your waste equipment at the time of disposal will help to conserve natural resources and ensure that it is recycled in a manner that protects human health and the environment. For more information about where

비미 고ク 모민 표대 마卡

240 Ca

you can drop off your waste equipment for recycling, please contact your local city office, your household waste disposal service or the shop where your purchased the product.
